HIGH SECURITY CONTAINER SEALS

High security container seals are designed to protect shipping containers and high-value cargo during transit. Manufactured to ISO 17712 standards, they provide certified strength, tamper evidence, and reliable security for international freight.

CONTAINER BOLT LOCK

The Container Bolt Lock complies to ISO 17712 and CTPAT with it featuring two types of pins to counter forced removal. Made of hardened steel, it gives greater strength and reinforced security.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Pastel Blue

FORT CONTAINER SEAL (FCS)

The Fort Container Seal is a Mega Fortris patented two-colour container bolt seal. This seal complies to ISO 17712 and CTPAT with clear evidence of tampering from its innovatively designed locking mechanism.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Blue  Black  Green  Red
 White  Orange  Yellow

KLICKEER 2K (KLC 2K)

The Megalock is a combination structure of a container bolt and cable barrier seal to achieve robust security for high-value assets. It is strong and durable for all securing purposes, this seal complies with ISO 17712 and CTPAT with clear evidence of tampering.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  White  Blue  Green  Red  Yellow

MEGALOCK (ML)

The Megalock is a combination structure of a container bolt and cable barrier seal to achieve robust security for high-value assets. It is strong and durable for all securing purposes, this seal complies with ISO 17712 and CTPAT with clear evidence of tampering.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  White  Blue

MF BAR

MF Bar Seal is made of high-strength steel and complies to ISO 17712 and CTPAT. The MF Bar's locking mechanism is embedded in the groove of the metal bush, making the seal stronger and more difficult to tamper with. Identical sequential numbers on the bar and bolt seal provide greater security as this prevents parts substitution or replacement.

Available Colours:  Silver

INTERMEDIATE & HIGH SECURITY CABLE SEALS

Intermediate and high security cable seals are designed to secure containers, vehicles, and high-value cargo during transit. Manufactured to strict quality standards, these cable seals provide strong tamper resistance, flexibility, and reliable protection across a wide range of applications.

FORT MEDIUM CABLE LOCK 350

Fort Medium Cable Lock 350 is a fully steel-made security cable designed to secure assets. Available in a range of lengths. With a precisely designed locking mechanism, it is strong and durable for all securing purposes.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Blue  Green

CABLE LOCK

The Cable Lock is a fully steel-made security cable designed to secure assets. With a precisely designed locking mechanism, it is strong and durable for all securing purposes. This cable lock is available in a variety of thicknesses and lengths.

Speak with our sales team to discuss which variant is best for your applications.

Customisation: Company names, logos, barcodes/QR, serial numbers

Thicknesses (mm): 500, 350

Available Colours:  Black  Blue  Gold  Green  Red

MAXI CABLE LOCK ZINC 500

The Maxi Cable Lock Zinc 500 complies to ISO 17712 and CTPAT with a special entry point designed to prevent tampering attacks. It is strong and durable to secure high-value assets.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Pastel Blue  White

MEGA CABLE LOCK 350 2B

The Mega Cable Lock 350 2B version includes two locking bodies for a single length of wire. This version is designed for longer cable lengths and provides greater strength and security. This seal complies to ISO 17712 and CTPAT with a precisely designed locking mechanism.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Blue  Red

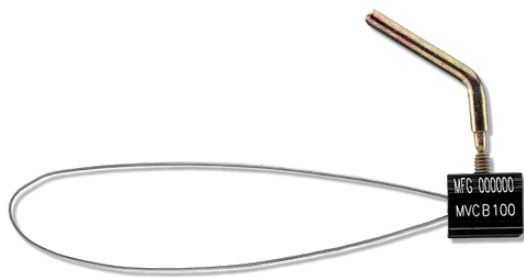

METER VALVE CABLE BREAKAWAY

The Meter Valve Cable Breakaway features a hardened metal special shear bolt locking mechanism where its shaft will break when it is tightened to secure the asset and authentication tagging.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  White  Blue  Black  Red
 Gold  Silver

MINI CABLE BREAKAWAY

The Mini Cable Breakaway has a shear bolt locking mechanism that its shaft will breakaway when it is tightened to secure the asset. It is affordable without compromising security. The design is simple and light for any security application.

Customisation: Company names, logos, barcodes/QR, serial numbers

Thicknesses (mm) 150, 250

Available Colours:  White  Blue  Black  Silver
 Gold  Red  Green

MINI CABLE LOCK

The Mini Cable Lock is a full steel high-security cable seal designed to secure high-value assets. One-way locking mechanism is embedded for fast and easy application.

Customisation: Company names, logos, barcodes/QR, serial numbers

Thicknesses (mm): 150, 250

Available Colours:  Blue  Green  Red  Black  Gold

MINI CABLE LOCK PREMIUM NV

The Mini Cable Lock Premium New Version is delicately designed with tamper-evident features in a small-sized seal. The seal is durable and versatile for indicative security applications.

Customisation: Company names, logos, barcodes/QR, serial numbers

Thicknesses (mm): 150,180

Available Colours:  White  Pastel Red

MINI CABLE LOCK PREMIUM 180 2K

The Mini Cable Lock Premium 180 2K is delicately designed with various tamper-evident features, including being moulded with Mega Fortris' patented two-colour body for improved visibility and to deter tampering attacks.

Customisation: Company names, logos, barcodes/QR, serial numbers

Available Colours:  Pastel Red  Pastel Blue  Pastel Yellow
